

Application Name:

User Security Administration Application

Release #:

1.0

Release Date:

6/29/2020

Summary of Release:

The goal of this release is to provide an application that will allow the delegated administrator of local user security accounts to create or terminate a user account.

The first release will include a limited number of approved administrators' having access to the application.

The application accommodates the approved administrator to create a new user account by copying the security of a selected active user security access.

The application will provide the approved administrator access to two reports, an active user and a terminated user listing report.

The application will streamline and improve the timeliness of creating or terminating a user account.

There will be one approved Administrator account per court or approved state agency (ACC).
