#2017ACAP

Building Bridges

Arkansas Court Automation Program Systems Conference 2017

WHAT IS SESSION DIRECT?

#2017ACAP

- SessionDirect is a separate processing environment that enables court personnel to select existing events in Contexte and process them quickly and efficiently while in the courtroom or after court.
- After processing events and dispositions, SessionDirect passes the data back to Contexte.

LOADING CASES

#2017ACAP

The screenshot displays a web browser window titled "Oracle Fusion Middleware Forms Services". The main content area shows a form titled "SessionDirect Processing Query NMAMAIN (QUIZ)". The form contains several input fields for case details, each with a "LIST" button to its right:

- Case ID: [] LIST
- Court Code: [] LIST
- Location Code: [] LIST
- Case Type Code: [] LIST
- Event Location: [] LIST
- Room: [] LIST
- Event: [] LIST
- Judge ID: [] LIST
- Date: []
- Time: []

Below these fields are three checkboxes:

- ☐ Violations without Pleas
- ☐ Violations without Dispositions
- ☐ Violations without Sentences

At the bottom of the form are two buttons: "Load From CMS" and "Process Selected Cases".

The status bar at the bottom of the window displays the text: "Enter Case ID, press LIST to select from valid cases. Record: 1/1" followed by a series of empty input fields and the text "<OSC>".
